

Revitare[®] NANO

Lasting Protection
For Safe Life

THE WORLD'S FIRST -LONG TERM- PROTECTION
AGAINST VIRUSES & MICROBES

www.Revitarenano.com

سطح محصن من الجراثيم والبكتيريا
The Surface Is Immune to Germs & Bacteria

WHY DO WE NEED ANTIVIRALS & ANTIMICROBIALS ?

SHOCKING FACTS

80%

of Infections Passed by Human Hands,
Touching Contaminated Surfaces.

Centers for Disease Control and Prevention (CDC) USA

275 **BILLION \$**

Is the annual loss of U.S. Employers
collectively as a result of poor employee
health.

According to Forbes.com

WHY DO WE NEED ANTIVIRALS & ANTIMICROBIALS ?

- “ Micro-organisms can remain on surfaces for hours & days. ”

According to US News & World Report

- “ E.g. The flu virus can live and potentially infect other people for up to 48 hours after being left behind on a surface. ”

Centers for Disease Control and Prevention (CDC) USA.

WHAT IS THE SOLUTION ?

Revitare[®] NANO

THE PERFECT SOLUTION TO
FIGHT INFECTION ON SURFACES

WHAT IS REVITARE NANO[®] ?

The world's first product, long lasting, innovative & safe, makes Nano Silver layer sustainable and effective to protect surfaces against the spread of viruses and microbes.

The Technology

Sophisticated, uses Nano-Silver technology to eliminate viruses, microbes, for long lasting protective.

The Efficiency

Effective layer, designed for 7/24 protection for up to 365 days.

The Cost

It Saves money by cutting out the need to use cleaners or harsh chemicals.

Composition & Appearance

Unique product, water based, invisible, odorless, and enhances the color and appearance of treated surfaces.

The Safety

ECO-Friendly, Non-toxic, Effective, bio-safe for humans & animals.

The Strength

Water-resistant, can be use to protect all porous and nonporous surfaces.

Finally..

Continuously fights the growth of microbes that cause odors and discoloration of surfaces and prevents mold & mild formation.

HOW DOES REVITARE NANO[®] WORK?

1

When the microbe touches the protected surface, silver ions attack the microbe's body by tearing and penetrating its wall.

2

Silver ions prevent the cellular respiration from the microbe, depriving its cells of receiving nutrients.

3

Silver ions hit the microbe's RNA, preventing it from splitting and proliferating and destroying it completely.

THE DIFFERENCE BETWEEN REVITARE NANO[®] AND OTHERS

Revitare NANO

Other Products

Active Substance

Natural Material (silver particles)

Chemical compounds: (chlorozulenol, benzalkonium chloride)

Long-term Efficacy

7/24 and 365 continuous protection

Limit to a maximum of 12 hours.

Financial Cost

Saves up to %90 of what other products cost

High cost compared with time and efficiency, for repeat sterilization.

Health Protection

Safe for the skin, respiratory and nervous system

Causes skin allergies, respiratory and neurological irritation

Impact on surfaces

Rejuvenates the surface , enhances colors, protects against scratches, moisture and extends the lifetime

Affects the color and texture of surfaces and extinguishes their shine

PROTECTION GAINS BY REVITARE NANO[®] ?

Provides a safe preventive environment protected from the spread of infection to staff and customers.

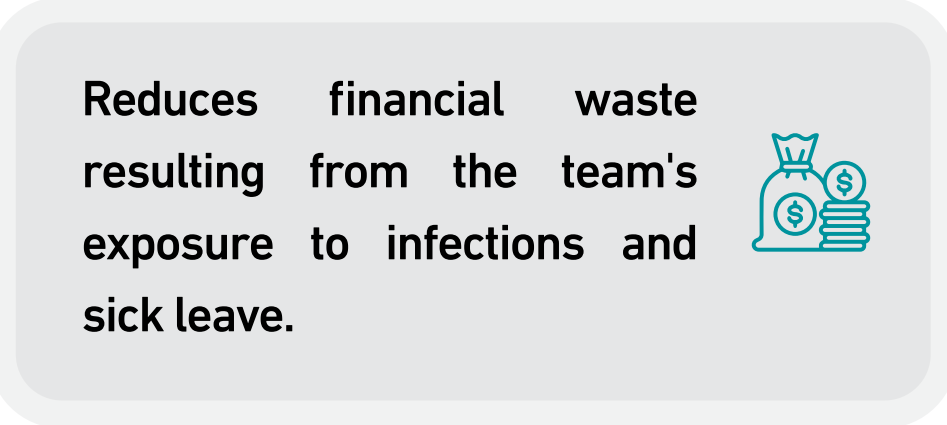

Gives you the confidence and loyalty of your customers to care for them with the highest standards of prevention and safety in your facility.

Eliminates the fears and risks of weak traditional sterilizations, poor employment performance and difficulty in controlling the quality of sterilization

Reduces financial waste resulting from the team's exposure to infections and sick leave.
